

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE ACADEMY desire it to be understood, that they are not answerable for any opinion, representation of facts, or train of reasoning, that may appear in the following papers. The Authors of the several Essays are alone responsible for their contents.

SCIENCE.

ART.	PAGE
<p>I. <i>Upon a new Method of investigating the Specific Heats of the Gases.</i> <i>By JAMES APJOHN, M.D. M.R.I.A., Professor of Chemistry in the Royal College of Surgeons, Ireland. Read March 16, 1837,</i></p>	1
<p>II. <i>Analysis of a Meteoric Stone which fell near Adair, in the County of Limerick, on September 10, 1813. By JAMES APJOHN, M.D. M.R.I.A., Professor of Chemistry in the Royal College of Surgeons, Ireland. Read May 23, 1836,</i></p>	17
<p>III. <i>On the Laws of Crystalline Reflexion and Refraction. By JAMES MAC CULLAGH, Esq., A.M. M.R.I.A., Fellow of Trinity College, Dublin, and Professor of Mathematics in the University. Read January 9, 1837,</i></p>	31
<p>IV. <i>On a hitherto unobserved Structure discovered in certain Trap Rocks in the County of Galway. By ROBERT MALLET, Esq., M.R.I.A. Read April 10, 1837,</i></p>	75
<p>V. <i>On a new Gaseous Compound of Carbon and Hydrogen. By EDMUND DAVY, Esq., F.R.S. M.R.I.A., &c., Professor of Chemistry to the Royal Dublin Society. Read June 26, 1837,</i></p>	80
<p>VI. <i>Remarks on the Species of Seals (Phocidæ) inhabiting the Irish Seas. By ROBERT BALL, Esq., M.R.I.A., &c. Read December 12, 1836,</i></p>	89
<p>VII. <i>On a Series of Combinations derived from Pyroacetic Spirit. By ROBERT KANE, M.D. M.R.I.A., Professor to the Royal Dublin Society, and to the Apothecaries' Hall of Ireland, Corresponding Member of the Society of Pharmacy, and of the Society of</i></p>	

ART.		PAGE
	<i>Medical Chemistry of Paris, Honorary Member of the Society of Apothecaries of the North of Germany, &c.</i> Read March 16, and April 10, 1837,	99
VIII.	<i>On the Insulation of Fluorine.</i> By GEORGE JAMES KNOX, Esq., A.M. M.R.I.A., and the Rev. THOMAS KNOX, M.R.I.A. Read April 10, 1837,	127
IX.	<i>On the Composition of certain Essential Oils.</i> By ROBERT KANE, M.D. M.R.I.A., Professor of Natural Philosophy to the Royal Dublin Society, and of Chemistry to the Apothecaries' Hall of Ireland, Corresponding Member of the Society of Pharmacy and of the Society of Medical Chemistry of Paris, Honorary Member of the Society of Apothecaries of the North of Germany, &c. Read June 12, 1837,	135
X.	<i>On the Properties of Voltaic Circles, in which concentrated Sulphuric Acid is the Liquid Conductor.</i> By THOMAS ANDREWS, M.D. M.R.I.A., Professor of Chemistry in the Royal Belfast Institution. Read April 9, 1838,	149
XI.	<i>On a new Variety of Alum.</i> By JAMES APJOHN, M.D. M.R.I.A., Professor of Chemistry in the Royal College of Surgeons, Ireland. Read April 10, 1837,	157
XII.	<i>On a new Compound, consisting of Iodide of Potassium, Iodine, and the Essential Oil of Cinnamon.</i> By JAMES APJOHN, M.D. M.R.I.A., Professor of Chemistry in the Royal College of Surgeons, Ireland. Read April 23, 1838,	162
XIII.	<i>On the Argument of ABEL, respecting the Impossibility of expressing a Root of any General Equation above the Fourth Degree, by any finite Combination of Radicals and Rational Functions.</i> By the PRESIDENT. Read May 22, 1837,	171
XIV.	<i>On the Irish Hare. (Lepus Hibernicus.)</i> By WILLIAM THOMPSON, Esq., Vice-President of the Natural History Society of Belfast. Read May 28, 1838,	260
